

DOUBLE DOWN WITH THIS WEED CONTROL COMBO

SureGuard® SC
HERBICIDE

Save time and labor with Cheetah® Pro + SureGuard® SC in dormant Bermudagrass and landscape settings. In landscape and bareground areas, this non-selective and residual tankmix delivers 6 months or more of weed control and faster knockdown than non-selectives alone. Apply to non-overseeded dormant Bermudagrass for lasting Poa control without delaying Bermudagrass green-up come spring. Plus, with two unique actives, this tankmix tackles resistant weeds and halts further resistance development.

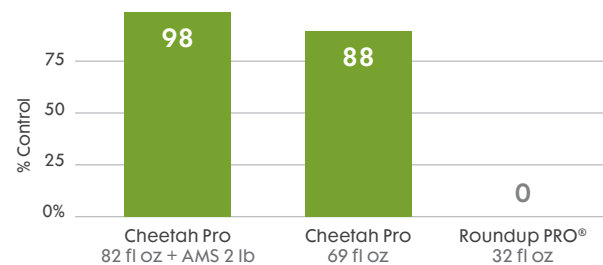

GET THE JOB DONE WITH CHEETAH PRO + SUREGUARD SC

SureGuard SC controls pre- and post-emerge weeds, often 6 months or more

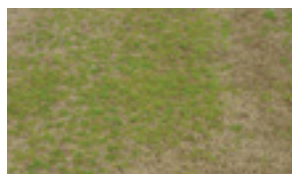

Mix Cheetah Pro and SureGuard SC for fast, post-emerge knockdown and the longest pre-emerge residual, even on glyphosate-resistant weeds

Glyphosate-resistant Poa Control in Dormant Bermuda
Applied Feb 13, 2020. Evaluated April 1, 2020 (48 DAT). AMS + NIS included. East Tennessee AgResearch and Education Center.

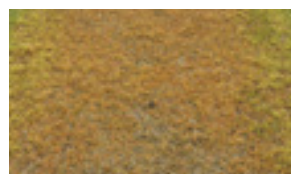

GLYPHOSATE-RESISTANT POA CONTROL // 76 DAT

RELIABLE POA CONTROL // 27 DAT

UNTREATED
