SUREGUARD® SC
HERBICIDE

MULTI-USE HERBICIDE, INCLUDING AQUATICS.

Gain options with one product for many use sites. Long-lasting SureGuard® SC is labeled for weed control in nurseries, landscapes, bare ground, cracks and crevices, dormant Bermudagrass and aquatics areas.

KNOCK OUT TOUGH WEEDS QUICKLY
- Long 6 month residual control of grass and broadleaf weeds
- Easy to mix and apply liquid formulation
- Broad spectrum including tough-to-control weeds
- Fast and effective knockdown when tank mixed with a non-selective, even on resistant weeds
- Non-staining spray formulation with minimal color, odor, off-target movement or volatility concerns

UNBEATABLE AQUATIC WEED CONTROL
- Fast and selective control of tough invasive and nuisance plants
- Dissipates quickly from the water column and does not accumulate in sediment = favorable environmental profile
- Concentrated formula requires less product for application, transport and handling ease

FAST AND SELECTIVE CONTROL OF TOUGH INVASIVE AND NUISANCE PLANTS
Trial Work, M. Belland, Aquatic Control Technology, 2012
Application Date: May 17, 2012 | Pond Location: Northwest Connecticut
Target Plants: Curlyleaf pondweed (submersed) and filamentous, green algae (floating)

EPA REG. NO. 71368-114
ACTIVE INGR. flumioxazin
FORMULATION liquid SC
CHEM. FAMILY N-phenylphthalimide
HRAC NO. 14
SIGNAL WORD no signal word required
RESTRICTED no
PACKAGE SIZE 1 pt (8 per case), 64 fl oz (4 per case)

SureGuard® SC

MULTI-USE HERBICIDE INCLUDING AQUATICS.

KEY USES
Dormant Bermudagrass on residential sites, golf courses, and sod farms
Landscape ornamentals
Non-bearing fruit and nut trees, vines
Non-crop areas: around buildings, fencerows, gravel surfaces, driveways, and ground mats
Slow moving or quiescent aquatic sites

USE SUMMARY
WOODY LANDSCAPE ORNAMENTALS AND BARE GROUND AREAS
Application of SureGuard® SC in the vicinity of ornamental plants is limited to directed sprays around well established woody shrubs and conifer and deciduous trees listed in the product label. SureGuard SC may also be applied to maintain bare ground in non-crop areas as listed in the product label. Do not apply this product within any enclosed structure.

Pre-emergence Weed Control: Mix 0.18 to 0.27 fl oz of this product per gallon of spray solution and apply 1 gal of spray solution to 1,000 sq ft prior to weed germination.

Post-emergence Weed Control: Mix 0.18 to 0.27 fl oz of this product per gallon and apply 1 gal of spray solution to 1,000 sq ft to actively growing weeds.

DORMANT BERMUDAGRASS (Only for use in certain states, see product label)
SureGuard SC may be applied as a single or split application to well established non-overseeded dormant Bermudagrass. It will provide pre-emergence and early post-emergence control of annual bluegrass, chickweed, henbit and other winter annual weeds listed in the product label and pre-emergence control of crabgrass, goosegrass and other summer annual weeds listed in the product label. Alternatively, SureGuard SC can be tank mixed in completely dormant Bermudagrass with a non-selective herbicide such as Cheetah®, for enhanced post-emergence and lasting residual weed control. Application of this product to actively growing turfgrass or during green-up may cause unacceptable injury.

Broadcast Application: Apply 8 to 12 fl oz of this product per broadcast acre as a pre-emergence application.

SLOW MOVING OR QUIESCENT AQUATIC SITES
SureGuard SC is a contact herbicide that quickly degrades in water. Good coverage and contact time is essential. Make applications with sufficient volume of water according to the label. When making applications to floating or emergent weeds, apply at 6 to 12 fl oz/A and mix with an adjuvant approved for aquatic sites. For subsurface applications apply SureGuard SC at 200 to 400 ppb in the water column. Please see label for information on the effects of high pH on plant response and efficacy.

See label for complete directions for use.

SUREGUARD SC DELIVERS OUTSTANDING WATERMEAL CONTROL
Pennsylvania Experimental Use Permit (EUP) trial conducted by Cygnet Enterprises, Inc.
Target aquatic plant = watermeal; Rate = 150 ppb
