

ANSWER YOUR WEED CONTROL CHALLENGE.

When it comes to weed control, the best chance for success starts with the right solution. That's why we offer a full line of premium herbicide solutions – designed to meet your exact weed or growing condition challenge.

PREMIUM HERBICIDES	ADVANTAGES
4-SPEED™ XT 2,4-D triclopyr dicamba pyraflufen	<ul style="list-style-type: none"> • Increased speed of activity • Increased control of difficult to control weeds • Good activity when used in very early spring • Labeled for use on golf course putting greens
COOL POWER® 2,4-D triclopyr dicamba	<ul style="list-style-type: none"> • Ester formulation helps to increase movement of AIs into weeds – increased efficacy during low growth, cool seasons • Triclopyr can increase activity on difficult to control weeds • 2,4-D-free herbicide for sensitive sites
HORSEPOWER® MCPA triclopyr dicamba	<ul style="list-style-type: none"> • Amine formulation decreases potential for volatility and movement to sensitive plants during warmer temperatures • Triclopyr can increase activity on difficult to control weeds • 2,4-D-free herbicide for sensitive sites
ESCALADE® 2 2,4-D fluroxypyr dicamba	<ul style="list-style-type: none"> • Increased activity on difficult to control weeds with addition of fluroxypyr
SURE POWER® 2,4-D fluroxypyr triclopyr flumioxazin	<ul style="list-style-type: none"> • Flumioxazin provides faster visual response than of any of the PPO inhibitors • Fluroxypyr and triclopyr provide increased activity on difficult to control weeds • Flumioxazin helps to break down waxy cuticles of weeds to increase uptake of other AIs • Provides excellent control of weeds even in the heat of the summer when weeds aren't growing as vigorously and cuticles are thickened
CHANGE UP™ MCPA fluroxypyr dicamba	<ul style="list-style-type: none"> • Fluroxypyr provides increased activity on difficult to control weeds • This formulation can be applied to sensitive warm-season species like St. Augustinegrass and centipedegrass
MILLENNIUM ULTRA® 2 2,4-D dicamba cloprialid	<ul style="list-style-type: none"> • Clopyralid provides increased activity of difficult to control weeds – specifically clovers and thistles • Specifically for use on sod farms, golf courses, athletic fields, and other non-residential areas

PREMIUM HERBICIDES	ADVANTAGES
TRIPLET® LOW ODOR 2,4-D TIPA MCPP dicamba	<ul style="list-style-type: none"> • Provides broad-spectrum control of broadleaf weeds with a low odor TIPA formulation of 2,4-D. Great for use in high-density housing areas, parks, etc.
MANOR® metsulfuron	<ul style="list-style-type: none"> • Increased activity on difficult to control weeds • Can be tankmixed with Change Up or Escalade 2 to provide excellent control of especially difficult weeds like doveweed and Virginia buttonweed • Provides control of weedy grasses in Kentucky bluegrass, fine fescue, Bermudagrass, and St. Augustinegrass
CERTAINTY® sulfosulfuron	<ul style="list-style-type: none"> • Increased activity on many difficult to control weeds in warm-season turf • Excellent control of sedges, tall fescue, annual bluegrass, and ryegrass • Suppression of grassy weeds like dallisgrass and rescuegrass
CELERO® imazosulfuron	<ul style="list-style-type: none"> • Unparalleled control of sedges including false green kyllinga • Excellent safety on all turfgrass species
Q-BALL™ quinclorac	<ul style="list-style-type: none"> • Excellent post-emergence control of crabgrass and other annual grasses like foxtail and barnyardgrass • Great tankmix partner with other broadleaf weed herbicides to add broadleaf activity and crabgrass control at the same time • Great safety on all cool-season turf species
QUINCEPT® 2,4-D dicamba quinclorac	<ul style="list-style-type: none"> • Quinclorac adds broadleaf activity and crabgrass control
