

Tourney® EZ
FUNGICIDE

One Solution for the Entire Landscape

Tourney® EZ delivers premium disease management for the entire landscape, providing proven control of challenging turfgrass and ornamental diseases with a single, versatile solution. Powered by metconazole, a systemic Group 3 fungicide, Tourney EZ helps arborists and landscape professionals protect high-value properties from brown patch, dollar spot and fairy ring in turf, while also managing ornamental diseases such as anthracnose, apple scab, powdery mildew, leaf spots and conifer blights. With preventive and curative flexibility, foliar spray or drench applications, and long-lasting performance across trees, shrubs and turfgrass, Tourney EZ helps professionals simplify disease management while delivering exceptional results.

COMPETITIVE ADVANTAGES

- Control key turfgrass and ornamental diseases with one fungicide
- Systemic metconazole provides dependable, long-lasting disease protection
- Broad-spectrum control of brown patch, dollar spot, anthracnose, apple scab, powdery mildew, leaf spots and conifer blights
- Flexible foliar spray and soil drench applications for above- and below-ground disease management
- Delivers preventive and early curative disease control across the landscape
- Simplifies programs and improves operational efficiency for arborists and landscape professionals

Brown patch
Dollar spot
Fairy ring
Fusarium patch
Grey leaf spot
Grey snow mold
Take-all patch
Zoysia patch

ORNAMENTAL DISEASES
Anthracnose
Blossom rot/ Brown rot
Botrytis
Conifer blight
Damping off/ Stem & root rots
Eastern filbert blight
Leaf spots
Powdery mildew
Rusts
Scab
Shot hole

USE SUMMARY

TURFGRASS DISEASES	FL OZ/A
Brown patch Begin applications when conditions favor disease.	12–16
Dollar spot Use preventatively.	8–16
Fairy ring Apply as soon as possible after first symptoms appear. Apply in a volume of 4 gal per 1,000 sq ft. For optimal control, reapply after 21 days. Symptoms may take several weeks to disappear following application.	16

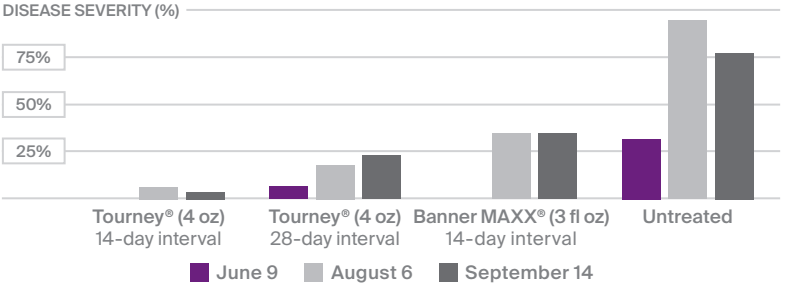

ORNAMENTAL DISEASES	FL OZ/ 100 GAL
Apply on a 14-to-28-day interval, as a foliar spray when targeting foliar diseases or as a drench when targeting crown and/or root diseases. 100 gallons of spray mix will treat 20,000 sq ft of area when using a typical high-volume sprayer.	1–4

PROVEN PERFORMANCE

Tourney delivers superior apple scab control, even on 28-day spray intervals. See how it outperforms the industry standard below.

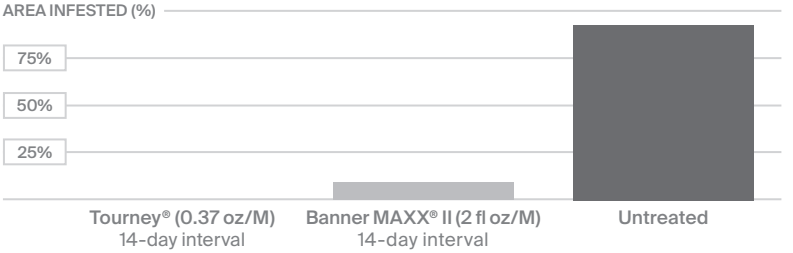

APPLE SCAB CONTROL, CRABAPPLE (MALUS SP.) TREES

B. Rao, Davey Tree. Treatments were applied 23 April, 5 May (14 day interval only), & 21 May. Natural infections of Venturia inaequalis were rated. Rates are ounces per 100 gallons water.

BROWN PATCH CONTROL ON LAWNS, COLONIAL BENTGRASS

B. Clarke, Rutgers U. 14-day intervals, 2004; evaluation on Aug. 5 was heaviest pressure in untreated plots.
