

Velocity[®] PM

POA MANAGEMENT HERBICIDE

MANAGE POA AT YOUR PACE

Get exceptional, flexible support for your transition program. Remove *Poa annua*, *Poa trivialis* and numerous broadleaf weeds – gradually, selectively and thoroughly. Velocity PM helps you transition a Poa-mixed stand back to purer turf.

NEW 3-YEAR TRANSITION PROGRAM

Velocity PM can effectively remove Poa in one season. But for optimal results, we've perfected a new multi-season program to ensure your turf always looks its best – and stays free of bare spots – throughout the transition.

1
YEAR

Take Control

Repeated applications at lower rates are ideal for a steady decline of Poa while allowing the favored turf species a chance to fill bare spots.

RATE	INTERVAL	APPLICATIONS
.75 fl oz/A	14-21 days	5

2
YEAR

See Results

With visibly less Poa, repeat the same program in the second year, and Poa should be almost undetectable.

RATE	INTERVAL	APPLICATIONS
.75 fl oz/A	14-21 days	5

3
YEAR

Maintain Purer Turf

Now with less than 10% Poa remaining, maintain clean fairways with higher rates and fewer applications.

RATE	INTERVAL	APPLICATIONS
2.25 fl oz/A	14-21 days	2-3

Perfect your Poa-management program at

Advantages

Safe for most cool-season and dormant Bermudagrass (overseeded and non-overseeded)

Suppresses dollar spot

Suppresses seedhead production

Suppresses broadleaf weeds

Can be used before and/or after overseeding

Keys to Success

Stick to the program – intervals and repetition are key

Apply to healthy, actively growing turf

Apply at temperatures 70-90°F

Tank-mixes well with fertilizers, fungicides and PGRs

Do not tank-mix with wetting agents or surfactants

Avoid irrigation or mowing within 4 hours
