

2026 Summer Program

CURATOR™ FUNGICIDE

Scorching Hot Rebates to Stop Pythium Cold

June 1 – August 31

Stronger Protection. Greater Peace of Mind.

Pythium foliar, crown and root diseases can develop rapidly under high-temperature, high-humidity conditions, particularly in persistently moist turf. Curator combines propamocarb (carbamate class) and mefenoxam (acylalanine class) to deliver dual MOA activity against pythium species. Even under high disease pressure, Curator brings added consistency to pythium management by reducing resistance pressure and improving preventative and curative disease control.

Pythium Solutions

- Apply Curator at 3–6 fl. oz. per 1,000 sq. ft., adjusting for seasonal disease pressure.
- Begin treatments at 2–3 week intervals until temperatures increase.
- During high disease pressure, shift to 7-14 day intervals.
- After each application, lightly irrigate to wash the fungicide into the root zone.
- Compatible with programs utilizing Signature and phosphites.
- Pythium Blight: rotate Curator with cyazofamid.
- Pythium Root Rot: alternate a three-way rotation schedule with cyazofamid and picarbutrazox (Serata).
