

Tomahawk 2 – a new tool for grassland weed control

Tomahawk 2 (200g/litre fluroxypyr) will be available in May 2020 and compliments the Nufarm herbicide range in grassland. **Nettle, dandelion, docks and chickweed** are all controlled by this new Emulsifiable Concentrate formulation of fluroxypyr. Tomahawk 2 is a particularly good mixing partner with Nufarm phenoxy herbicides to give enhanced control of weeds in both permanent pasture and new sown leys.

Maximum rates in grassland:

- 2.0 l/ha in permanent grassland
- 0.75 l/ha in newly sown leys

A convenient pack size of 5 litres

Agronomy solutions with Tomahawk 2 :

Docks, thistles, nettles, dandelion, buttercup, cow parsley*

- **Thrust 2.5 l/ha + Tomahawk 2 at 1.0 l/ha**

Soft Rush

- **Lupo 3.5 l/ha + Tomahawk 2 at 1.0 l/ha**

Ragwort and hogweed*

- **Thrust 3.5 l/ha + Tomahawk 2 at 1.0 l/ha**

Brambles* and broom*

- **Tomahawk 2 at 2.0 l/ha**

Seedling docks, chickweed, fat hen in new sown leys

- **Embutone 2.5 l/ha + Tomahawk 2 at 0.75 l/ha**

* Supported off label weeds

Tomahawk 2 can also be used in maize, wheat, barley, oats, rye, durum wheat and triticale

Lupo contains 345 g/l 2,4-D + 345 g/l MCPA
 Thrust contains 344 g/l 2,4-D + 120 g/l dicamba
 Embutone contains 400g/l 2,4-DB
 Tomahawk 2 contains 200 g/l fluroxypyr

Apply to active leafy growth, pre flowering in 200 litres/ha of water. Low drift air inclusion nozzles are recommended.

Grazing interval of Tomahawk 2 is only 7 days. In mixes the interval is 2 weeks or until any ragwort has completely recovered or died and there is no visible sign of the dead weed.
