Diquat SPC 2L

NON-SELECTIVE HERBICIDE

FAST-ACTING CONTROL OF TOUGH AQUATIC WEEDS.

Nufarm Diquat SPC 2L has long been a workhorse herbicide for the specialty market. Diquat SPC 2L herbicide provides non-selective control of aquatic weeds on contact. It spreads quickly through the water for broad-spectrum control of floating, submersed and marginal weeds. The product is foliar-applied and is slightly translocated through plant tissue. A surfactant enhances activity. It is completely inactivated on contact with soil. With Diquat SPC 2L herbicide, there are no concerns about groundwater, toxicity to fish, other organisms or wildlife.

COMPETITIVE ADVANTAGES

- Works quickly — no waiting for aquatic weed control
- Broad-spectrum activity successfully controls key aquatic weeds
- Non-systemic, contact activity controls only the weeds it contacts
- Easy-to-use liquid formulation makes application trouble-free

AT-A-GLANCE INFO

EPA REG. NO. 228-675

ACTIVE INGR. diquat dibromide (37.3%)

FORMULATION liquid

CHEM. FAMILY bipyridilium

GROUP NO. 22

MODE OF ACT. acts on contact absorbs energy produced by photosynthesis; forms peroxides that disrupt living cells

SIGNAL WORD caution

RESTRICTED no

PACKAGE SIZE 1 gal container
(4 per case),
2.5 gal container
(2 per case), 250 gal drum

Diquat SPC 2L

FAST-ACTING CONTROL OF TOUGH AQUATIC WEEDS.

KEY USES

Aquatic areas*

Commercial greenhouses and nurseries

Dormant established turfgrass (Bermudagrass, zoysiagrass – nonfood or feed crop)

Landscape, industrial, recreational, commercial, residential, and public areas

Ornamental seed crops (flowers, bulbs, etc. – excluding the state of California)

Turf renovation (all turf areas except commercial sod farms)

KEY WEEDS CONTROLLED

(See product label for complete list)

FOATING AND MARGINAL WEEDS:

Water lettuce

Water hyacinth

Duckweed

Salvinia spp.

Pennywort

Frog's bit

Cattails

SUBMERGED WEEDS:

Bladderwort

Hydrilla

Watermilfoils

Pondweeds**

Coontalea spp.

Brazilian elodea

Naiad

Algae†

* Diquat SPC 2L cannot be applied for aquatic uses in New York state without Supplemental Special Local Needs labeling

** Diquat SPC 2L herbicide does not control Richardson's pondweed, *P. richardsonii*

† Suppression only

USE SUMMARY

Diquat SPC 2L herbicide is used to control aquatic weeds in public waters such as ponds, lakes, reservoirs, marshes, bayous, drainage ditches, canals, streams, rivers, and other slow moving or quiescent bodies of water. Do not apply to water that is moving or if outflow leads to public waters.

Do not apply this product through any type of irrigation system.

Take caution to avoid drift onto desirable crops and vegetation.

OPTIMUM CONTROL OF SUBMERSED WEEDS

Optimum control of submersed weeds is obtained by applying Diquat SPC 2L herbicide when the weeds are actively growing (photosynthesizing), typically when water temperatures are about 50°F or more. Do not apply to weeds growing under stress.

See product label for complete directions for use.
